

**PRECISION
ENGINEERED
PRODUCTS**

BEST SOLUTION. BEST VALUE. SINGLE SOURCE.

GROUP OVERVIEW

The Precision Engineered Products Group of NN, Inc. combines in-depth materials science expertise with advanced engineering and production capabilities to design and manufacture an extensive range of high precision metal and plastic components and assemblies. The PEP Group serves a broad base of blue-chip customers and others in diverse markets through facilities located worldwide across the US, Mexico, China, and the Dominican Republic.

John Manzi, Senior Vice President, General Manager

- Markets Served:

- Medical
- Energy
- Transportation
- Aerospace & Defense
- Consumer

- 1300 Employees

- Broad Engineering Expertise

- Best-in-Class Tooling Capabilities

- 17 Manufacturing Operations in the U.S., Mexico, Dominican Republic & China

- Discrete Components to Finished Devices

- Multiple, Integrated Disciplines:

- Assemblies
- Clad Metal & Contact Tape
- Metal Machining
- Metal Stamping
- Plastic Molding & Machining
- Surface Finishing
- Electrical Contacts & Assemblies
- Thermostat Metal & Assemblies
- Devices & Tools
- Orthopedic Surgical Instruments

- Extensive Manufacturing Support:

- 700,000 sq. ft. of manufacturing capacity
- 16,800 sq. ft. of class 8 clean room space
- 200+ high-speed presses
- 80+ plastic molding machines
- 140+ machining centers
- 60+ cold heading machines

- New PEP Additive Manufacturing Center of Excellence

- 3D Prototyping Versatility

- New Sawbones Lab

- Fully Registered & Certified:

- AS 9100
- ISO 9001
- ISO 13485
- ISO TS16949
- NADCAP
- ITAR
- FDA Registration
- J-PAL Certification
- CE Marking Product Approval

- Medical
- Energy
- Transportation
- Aerospace & Defense
- Consumer
